

Making Reminiscing Fun

Rediscover Your Past
Big Print, Everyone Plays
Great Ice-Breaker
Conversation Changing
No Losers - Just Winners!

StayingMe is all about preserving memories, preserving identity, preserving you.

For Carers

We have a number of products aimed at helping carers of all kinds - from relaxation to organizational tools. While a loss of identity is frequently associated with dementia, carers are also gravely at risk of losing their identity, of knowing who they are.

For those with Dementia

To help rediscover and reinforce older memories, we have Memory Books, the Memory Game as well as other memory recall aids. We also have items such as our Bonding Bears to help improve emotional condition.

It's all about having fun.

The Memory Game is a fun way to rediscover and reinforce older memories that might easily remain forgotten.

It consists of 70 cards in a golden treasure bag, containing specially formulated questions to stimulate and rediscover long-term memories.

There are as many ways to play the game as you can invent but a fun option is to take it in turns to draw a card and ask the other about the memories that the card's question might draw out. By joining in you will make the whole thing much more fun than just a Q&A session - and you will be surprised how much you have forgotten about your own early life!

The game is also great as an ice-breaker and conversation starter. This can help to avoid getting stuck in the same conversations day-in and day-out as well as diverting conversations from known troubled spots.

Did you know?

The Memory Game is also a wonderful conversation starter. And you will remember things about yourself you had long forgotten!

How to play:

Just take it in turns to pick a card and ask a question. And if you wander off the topic, that's half the fun.

Other things of to look at:

- ◆ Memory Books
- ◆ Bonding Bears
- ◆ Echoes CD
